

C-Secure® Tracking

Vehicle/Fleet Tracking & Management

Vehicle monitoring & security

Track location, speed, stops. Receive alerts for speed, collision, crossing boundaries, duration of stops. Add driver authentication and a variety of security features for stopped and moving vehicles.

Example:
Rental Cars

Fleet management

Monitor time and location. Manage speed with alerts. Identify planned stops not taken. Deter theft by monitoring and alerting on unplanned stops. Add authentication and security features, such as panic buttons that disable a stopped vehicle from being restarted and can trigger a call to police or other service.

Example:
Trucks and tankers

Public transportation

Track location and time, in real time. Customize with detailed coordinates of all planned stops. Add authentication via RFID nametags on school-age children. Add security features as needed.

Example:
Bus line

Ground cargo tracking

Secure precious cargo, such as construction equipment or medical supplies/ pharmaceuticals, with tracking system on the cargo placed inside the truck.

Example:
Transportation company

Machine-to-Machine (M2M) communications have made it possible for businesses to interact with their assets like never before.

Through M2M communications, you can attain wireless control and management of your assets.

C-Secure® Tracking is available in a basic version or a premium version with management reports, analytics and dashboard. C-Secure helps owners and managers work smarter in the way they track, route, interpret and apply information related to their mobile assets.

M2M takes data from assets like equipment in the field, vending machines, ATMs and other remote assets, and provides the tools and connections to help companies run their operations more efficiently.

Improve performance and reduce risk...

C-Secure® Tracking fits the way you work and integrates with existing applications and systems. You own the assets, now you will also have the data that can lead you to a better return on those assets, while reducing risks inherent in asset ownership.
